THE REH-FIT: PROMOTING HEALTH AND WELLNESS AT A WORLD-CLASS LEVEL

The Reh-Fit Centre had its origins in a cardiology stress test laboratory that operated in the early 1970s at St. Boniface General Hospital. The laboratory was equipped with a treadmill for running the stress tests used to diagnose heart problems.

Following their heart attacks, patients began turning up for workouts on the treadmill. In 1975, the University of Manitoba offered the use of the underground track, known as the Gritty Grotto, in the basement of the School of Physical Education. Participants completed their cardiac rehabilitation under the supervision of medical and physical education staff.

The group became the founding members of the Reh-Fit when it opened in 1979 and began offering Canada's first community-based cardiac rehabilitation program. Its mission was to enhance the health and well-being of its members and the community by providing innovative health and fitness services through assessment, education, and exercise in a supportive environment.

Since then the Reh-Fit has helped build community wellness by encouraging individuals, groups, and the larger community to enjoy regular, healthy, active living that improves quality of life and longevity while relieving pressure on our health care system.

Our Cardiac Rehabilitation program has been saving and enhancing the lives of those with heart disease for more than 40 years. The program is particularly valuable, given that heart disease is the number one killer in Canada.

The Centre is fully accessible offering the latest medical and exercise equipment. We serve over 3,000 members/users and thousands of community users and others who take advantage of our educational seminars and programs. The Centre serves people throughout Winnipeg as well as from Manitoba's rural areas, and attracts a broad range of ages, from 12 to those in their 90s.

The Reh-Fit holds annual events that promote healthy living, works with other groups and organizations to help bring innovative programs and services to the community, and supports research to assess the effectiveness of health and fitness programs in building community health.

Following a \$12-million expansion and renovation completed in January 2006, the Reh-Fit continues to promote community health and fitness at a world-class level.

VOLUNTEER OPPORTUNITIES

We are a volunteer organization – from the Boards of Directors through to committees with volunteers dedicated to helping with special events, mailings, and fund development. We are dependent on our volunteers sharing their time, enthusiasm, and expertise to enhance the services of the Centre.

If you are interested in becoming involved, please fill out a form online or pick one up at the Reception Desk.

THE REH-FIT FOUNDATION

Planning for the Future

The Reh-Fit Foundation, established in 1999, supports the Centre’s mission by inspiring donations and stewarding both gifts and donors, thereby enhancing the health and well-being of our community. The Centre and Foundation count on the philanthropic support of individuals, foundations, corporations, and the work of our staff and volunteers.

By helping ensure the Centre’s long-term financial viability, the Foundation helps fulfill its vision to be the leader in building community health.

The Foundation takes a proactive approach to strengthening the Reh-Fit’s financial position. By raising additional funds now, over and above membership dues and user fees, the Foundation makes it possible for the Centre to maintain and expand its programming and renew its facility and equipment on an ongoing basis.

The Reh-Fit Centre, also a not-for-profit, registered charitable organization helps raise funds with the assistance of the Centre’s volunteers, members, community users, and staff.

Charitable Gifts Make a Big Difference in the Lives of Many at the Reh-Fit Centre

A gift to the Reh-Fit Foundation provides:

- **Prevention:** Your gifts provide leading-edge health and fitness programs to help people prevent chronic disease and live healthier lives.
- **Rehabilitation:** Your gifts create opportunity for the safest, most effective exercise to help people get better every day.
- **Accessibility:** Your gifts make Reh-Fit’s expertise accessible and affordable through our financial assistance program.
- **Research & Education:** Your gifts expand the impact of community education, including research studies, seminars, health screening clinics, and student placements.

The Reh-Fit Centre’s goal is to become the leader in building community health. To promote community health and fitness at a world class level, we need your help. Sustaining both our facility and high calibre of service requires more support than is

afforded through membership dues and user fees alone.
